"...to win the War and write the Peace!"

This is WAR. There is no place on your farm for 4F stock. You know that undernourished humans suffer from rickets, pellagra, beriberi and many another nutritional disease. Is it any wonder, then, that hogs, with their much more *limited* diet, are affected even more? And that costs you precious dollars; our country, precious food. Feed those deficient hogs a special ration—compounded by experienced nutritionists and scientifically mixed by machines that measure each vital ingredient, gamma by gamma—a ration like May Way Rich-A-Meal, that was specifically designed to put those 4F'ers back into a profitable 1A classification.
